Type: **Informative document**

Connections: **1**

Language: **Swedish**

Pages: **162**

Coordinates: **67°50'57.0"N 20°18'15.8"E**

Description:

This document was created to preserve the memory of the symbolic building before its demolition in April 2019. Conducted by the Norrbotten Museum, the detailed 162-page study analyzed the building's materials, both physically and chemically, taking advantage of the demolition to explore aspects that couldn't be examined while it was in use. This meticulous effort reflects a commitment to preserving knowledge of every detail of the structure.
